## TEST SUMMARY - 77231 SERIES

### 77231 SERIES INFORMATION

The 77231 Series is a collection of pass thru power bushings, using a 5/16" brass posts. There are colour and post length differences, but the core 77231 model does not change.

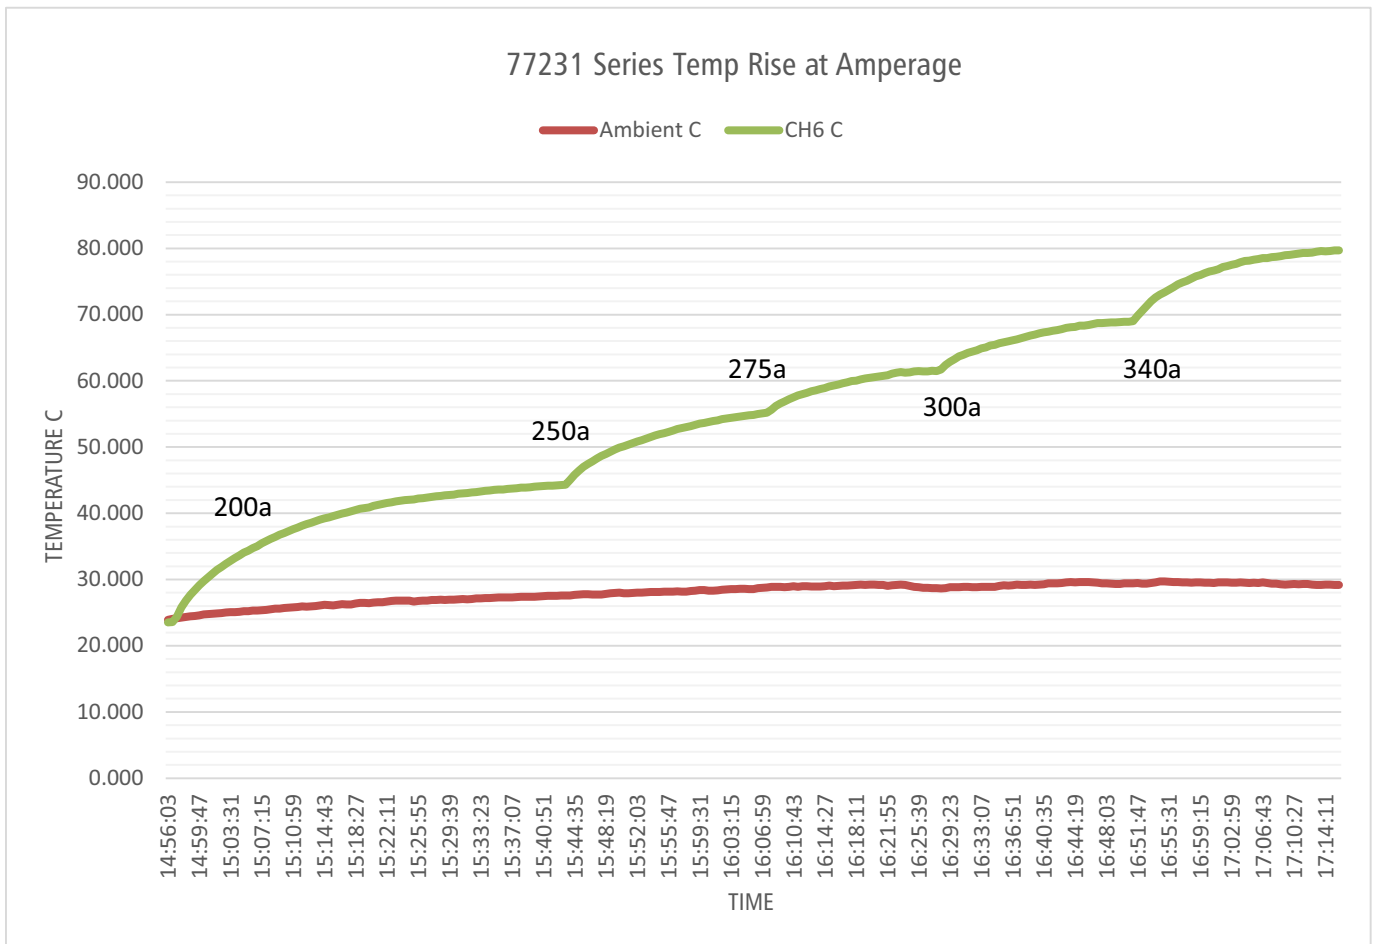

### TESTING EQUIPMENT

|                         |   |                               |
|-------------------------|---|-------------------------------|
| Electrical Testing Unit | - | Elektro-Automatik B-20080-340 |
| Data Capture Device     | - | DataQ DI-4718-B               |
| Cables                  | - | 4/0 guage                     |
| Test Run Date           | - | Mar 13, 2025                  |

### TEST RESULTS

### TESTING SUMMARY:

Current at 200a stays well below 50c, current at 250a stays below 60c. Running above 250a would require greater than 60c cabling. With 105c cabling, 350a can be maintained without reaching 100c.
